

SOLAR FILMS

BUILDING SAFETY 1 DAY.

This training is intended for companies active in the field of solar and safety films on building windows. It aims at presenting the basic principles of the films used, their handling and application. It also offers a better knowledge of glazing and frames as well as of application tools and accessories.

Duration:

1 day. To avoid extra travel costs and organization of the trainee's agendas we ask you to book at least 2 full days of training sessions at a time.

Maximum number of participants:

12 per trainer
6 per car maximum

Programme:

- + Recognition and analysis of various glazing types using measuring devices
- + Introduction to the risks of thermal shocks
- + Composition of solar and safety films
- + Tools and accessories required
- + Information regarding working methods and safety requirements applicable in public areas
- + Introduction to indoor and outdoor application of films
- + Basic techniques of film handling

Training sessions are not to be used for wrap purposes. The trainer will remove all film from the windows at the end of the session.

After the course, every participant will receive a certificate of attendance.
